RE: Water Emergency Plans

Yesterday there were water ban/emergency rumors circulating in our area. While we were able to confirm that the rumors were false, I want to take this opportunity to inform you about steps Maumee Schools has taken to allow us to complete one (1) school day with a normal dismissal schedule if a water ban is issued while we are in session.

Maumee will have bottled water and other liquids in district so that we could complete one (1) school day. We would be able to quickly post signs and cover drinking fountains, etc. We have hand sanitizer throughout buildings and classrooms. Food service staff would be able to safely serve lunch on this day.

In the event a water ban/emergency continued beyond one (1) day, Maumee Schools would review the facts at that time and consider holding classes with student/staff safety and comfort as our primary concerns.

If a water ban/emergency included only not drinking City water, consideration would be given to holding classes and parents would be asked to send a packed lunch and bottled water for their children.

If a water ban/emergency included not coming in contact with City water, Maumee would consider cancelling school.

Athletic practices and other student activities would be addressed as the water ban/emergency warranted.
