COVID Vaccine Interest Survey - Age 12-15

The Toledo Lucas County Health Department has made us aware of the possibility that the Pfizer COVID-19 vaccine may soon be approved for children ages 12 and up. Given we already have a vaccination clinic scheduled for May 14th, we need to conduct a survey to plan ahead should the vaccine be approved for use in the next week. Please complete the survey to inform the district of your choice with regard to having your 12-15 year old child receive the Pfizer vaccine. Maumee City Schools will need one survey completed for every student ages 12-15 as of May 14, 2021. Thank you!
